Art Unit: 3751

1. The disclosure is objected to because of the following informalities: Page 2, line 4, "first water outlet (83)" apparently should be --second water outlet (84)--.

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Newton.

The Newton reference discloses a valve comprising: a body 2,21 including an inlet 3, a first outlet 4, a second outlet 5, and a chamber 23 having an internal thread (pg. 1 lns. 83-84); a rod 17 including a core 29, a knob 32, O-rings 16,18, and an external thread 30; and a cover 31, as claimed. The phrase "substantially extending downwards from a bottom of the body" set forth in claim 1 has been considered but does not define any structure of the claimed valve over the valve of Newton.

4. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.
